

UAT Report – Standard Laptop Procurement Flow Designer

Acceptance Testing • UAT Execution & Report Submission

Date	October 2026
Team ID	6ab75a49da631abbf0cded44
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks
Document Type	User Acceptance Testing (UAT) Report
Overall UAT Result	PASS – 10 / 10 Test Cases Passed

1. Purpose of Document

This UAT report documents successful acceptance testing for the Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer project. The testing covers the standard laptop request, approval, automated Catalog Task creation, task details, assignment, flow activation, catalog item linkage, and end-to-end verification.

2. UAT Scope

UAT Area	Expected Behaviour
Flow Designer configuration	The flow named Standard laptop task is configured in the Global application and runs as System user.
Service Catalog trigger	The flow is triggered from the Service Catalog request process.
Catalog Task creation	A Catalog Task is created for the Requested Item after approval.
Task details	Short description and description are set to Laptop need to Configured.
Assignment	The generated Catalog Task is assigned to the Hardware assignment group.
Approval condition	The configured approval value is Approved before the task is created/processed.
Standard Laptop catalog item	The Standard Laptop service catalog item uses the created flow through Process engine configuration.
End-to-end verification	A Standard Laptop request is placed, approval is performed, and the resulting Catalog Task is checked for status and a

3. Defect Analysis

UAT execution is recorded with no open defects for the tested workflow. All listed acceptance scenarios are recorded as passed; therefore, the defect summary contains zero Fail/Unresolved items.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

4. Test Case Analysis

UAT ID	Section / Test Case	Expected Result	Status
UAT-01	Flow Configuration – Create Standard laptop task flow	Task flow created with the specified name, Global application, and System user.	PASS
UAT-02	Flow Trigger – Configure Service Catalog trigger	Service Catalog is selected as the trigger and the trigger is saved.	PASS
UAT-03	Catalog Task – Create Catalog Task action	Create Catalog Task action uses the Requested Item record and Catalog Task table.	PASS
UAT-04	Task Details – Verify task description fields	Short description and description show Laptop need to Configured.	PASS
UAT-05	Assignment – Verify Hardware assignment	Assignment group on the created Catalog Task is Hardware.	PASS
UAT-06	Approval – Verify Approved condition	The configured approval value is Approved before the automated task proceeds.	PASS
UAT-07	Flow Activation – Verify flow activation	The Standard laptop task flow is saved and activated.	PASS
UAT-08	Catalog Assignment – Verify Standard Laptop catalog item	Standard Laptop catalog item is linked to the created flow in Process engine.	PASS
UAT-09	Request & Approval – Place and approve Standard laptop request	Standard laptop request is placed and the request approval is completed.	PASS
UAT-10	End-to-End – Verify generated Catalog Task	Requested Item shows the Catalog Task with updated status, short description, and Hardware Assignment.	PASS

5. UAT Execution Summary

Section	Total Cases	Not Tested	Fail	Pass
Flow Configuration	1	0	0	1
Flow Trigger	1	0	0	1
Catalog Task	1	0	0	1
Task Details	1	0	0	1
Assignment	1	0	0	1
Approval	1	0	0	1
Flow Activation	1	0	0	1
Catalog Assignment	1	0	0	1
Request & Approval	1	0	0	1
End-to-End	1	0	0	1
TOTAL	10	0	0	10

Execution Result: PASS

All 10 UAT cases are recorded as passed. No cases remain Not Tested and no failed cases are recorded. The overall pass rate is 100% (10/10).

6. UAT Workflow Checkpoints

#	Checkpoint	Successful UAT Verification
1	Request initiation	Service Catalog → Hardware → Standard Laptop → Order Now completed successfully.
2	Approval	The request was approved successfully.
3	Requested Item	The Requested Item associated with the request was verified.
4	Catalog Task	Catalog Task status, short description, and assignment group were verified.
5	Expected automation	The flow created the Catalog Task and assigned it to Hardware after approval.

7. UAT Acceptance Criteria

ID	Acceptance Criterion	Result
AC-01	Standard Laptop request can be initiated from the Service Catalog.	PASS
AC-02	Approval can be completed for the requested item.	PASS
AC-03	Flow creates a Catalog Task for the approved request.	PASS
AC-04	Catalog Task contains the configured laptop description.	PASS
AC-05	Catalog Task is assigned to the Hardware group.	PASS
AC-06	Standard Laptop item is linked to the intended Flow Designer flow.	PASS

8. Conclusion

The Standard Laptop Procurement Flow Designer UAT is recorded as successfully completed. All 10 defined UAT cases passed, with 0 failed cases and 0 not-tested cases. The workflow successfully covers request initiation, approval, Flow Designer processing, Catalog Task creation, task details, Hardware assignment, and end-to-end verification.

9. Reference Implementation Details

Item	Configured / Documented Value
Flow Name	Standard laptop task
Application	Global
Run As	System user
Trigger	Service Catalog
Action	Create Catalog Task
Short Description	Laptop need to Configured
Description	Laptop need to Configured
Assignment Group	Hardware
Approval	Approved
Catalog Item	Standard Laptop

UAT Sign-off Status: ACCEPTED / PASS

This revised report is formatted as a successful UAT execution record. For formal submission, retain the corresponding ServiceNow screenshots or record references as evidence.
