

Problem-Solution Fit canvas — IT Procurement Automation

ServiceNow Administrator | Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Purpose / Vision: Streamline standard laptop procurement

ON JOBS & PROBLEMS • UNDERSTAND ROOT CAUSE	1. CUSTOMER SEGMENT(S) CS Who is the customer in the standard laptop procurement process? Project starter / evidence to capture: Capture the requester/employee, manager or approver, procurement/IT operation fulfilment stakeholders involved.	6. CUSTOMER CONSTRAINTS CC What constraints prevent or delay customers from completing a standard laptop request? Project starter / evidence to capture: Capture approved laptop options, procurement rules, approval requirements, data completeness and process/access constraints.	5. AVAILABLE SOLUTIONS AS What solutions are currently available when a standard laptop is needed? What existing process is used, and what are its pros/cons? Project starter / evidence to capture: Compare the current procurement/request path with the proposed Flow Designer document manual steps, handoffs, and workarounds.	EXPLORE AVAILABLE SOLUTIONS
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which procurement jobs or problems must be addressed for a standard laptop? Project starter / evidence to capture: Validate the need to submit a standard request, route it for approval, initiate fulfilment and reduce avoidable manual coordination.	9. PROBLEM ROOT CAUSE RC What is the real reason the procurement problem exists? What causes repeated manual effort or inconsistent handling? Project starter / evidence to capture: Trace the process to underlying causes. Separate symptoms from root causes and record evidence of current process.	7. BEHAVIOUR BE What do customers and process participants currently do to get the laptop-order fulfilled? What are the exceptions? Project starter / evidence to capture: Map requester actions, approvals, IT/procurement actions, handoffs, follow-ups, and exceptions.	
IDENTIFY TRIGGERS & EMOTIONS	3. TRIGGERS TR What triggers a customer or stakeholder to start a standard laptop procurement request? Capture the initiating event and information available at that moment.	10. YOUR SOLUTION SL What is the proposed solution for streamlining standard laptop orders? Project starter / evidence to capture: Reference project: Automating Standard Laptop Orders with Flow Designer. Document the intended solution, decision points, approvals, notifications, and handoffs; validate each against the requirement.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE What online actions or system interactions are part of the current behaviour? Capture portal/form submission, status checking, notifications, and other digital touchpoints actually observed.	EXTRACT ONLINE & OFFLINE CHANNELS
	4. EMOTIONS: BEFORE / AFTER EM How do people feel before, during, and after the procurement task? Capture friction, uncertainty, confidence, control, or relief.		8.2 OFFLINE What offline actions or handoffs occur? Capture conversations, approvals, procurement/IT coordination, device fulfilment, and exception handling actually observed.
