

Ideation Phase

Empathize & Discover — Empathy Map Canvas

Date	October 2026	Team ID	6ab75a49da631abbf0cded44
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Phase	Ideation Phase

Target User

Primary user: IT procurement team member handling standard laptop requests. **Related users:** employees requesting laptops and the Hardware team responsible for configuration.

SAYS	THINKS
"Standard laptop requests should move quickly after approval." "Configuration should be ready when the laptop arrives." "Manual steps can be missed or delayed."	How can we reduce repeated manual work? Will the approved request reach the Hardware team automatically? Can the process make task status easy to verify?
DOES	FEELS
Creates and handles Service Catalog requests; works with Standard Laptop; reviews approvals; checks Requested Item and Catalog Tasks; coordinates configuration.	Frustrated by delays and manual overhead; concerned about missed configuration steps; relieved when tasks are automatically assigned; expects a seamless procurement process.

PAINS

- Delays in standard laptop requests.
- Manual intervention and possible errors.
- Configuration may be overlooked or delayed.
- Inefficient allocation of IT resources.
- Longer user wait times.

GAINS / NEEDS

- Seamless standard laptop ordering experience.
- Automatic Catalog Task creation after approval.
- Clear assignment to the Hardware team.
- Timely laptop configuration.
- Better resource utilisation and productivity.
- Easy verification of task status.
