

PROJECT DESIGN PHASE

PROPOSED SOLUTION TEMPLATE

Date	October 2026
Team ID	6ab75a49da631abbf0cded44
Track	ServiceNow Administrator
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Project team shall fill the following information in the proposed solution template. This version has been prepared using the ServiceNow Administrator project-title reference.

S.No.	Parameter	Proposed Solution
1	Problem Statement (Problem to be solved)	ServiceNow incidents and support tickets may require manual classification. This can increase handling time and may lead to inconsistent categorization.
2	Idea / Solution description	Implement an automated ticket-classification solution using ServiceNow Flow Designer. The flow uses defined ticket information to automate the classification process and reduce repetitive manual work.
3	Novelty / Uniqueness	The solution applies Flow Designer automation to ticket classification within ServiceNow, providing a structured and repeatable approach to a common administrator task.
4	Social Impact / Customer Satisfaction	Faster and more consistent ticket classification can help support teams process incidents efficiently and improve the service experience for users.
5	Business Model (Revenue Model)	The solution can be implemented as an internal ServiceNow automation capability. For organizations, it can reduce manual administrative effort and support operational efficiency.
6	Scalability of the Solution	The Flow Designer approach can be extended to additional ticket categories, conditions, and automation rules as service-desk requirements grow.

Reference Project Titles

The reference PDF lists ServiceNow Administrator projects including: Script-Controlled ACL – Restrict Record Access Based on Field Value; Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer; Implement Client Script & UI Policy (Incident); Auto Ticket Classification using FLOW DESIGNER; and Import Data using Transform Maps (Spreadsheet).

Selected project for this proposed solution: **Auto Ticket Classification using FLOW DESIGNER.**
